

ISE GUIDELINES FOR MANUSCRIPT PREPARATION AND SUBMISSION TO THE JOURNAL OF ELECTROCARDIOLOGY

The *Journal of Electrocardiology (JECG)*, as the official journal of the International Society of Electrocardiology (ISE), offers an opportunity to publish peer-reviewed, fully indexed publications in the JECG, based on presentations at the annual International Congresses on Electrocardiology meetings (in an ISE symposium format as part of the March/April issue).

Speakers, poster presenters, and Young Investigator Award (YIA) finalists are invited to submit a manuscript. Manuscripts should be based on the author's ICE presentation, and may describe original research or review a field of research.

Manuscript Submission

Manuscript must be submitted by **August 31**, via the Elsevier web site

<http://ees.elsevier.com/jecg/> :

- Register if you have not previously, and then login as "Author".
- Review the "Author Information" list for manuscript and artwork guidelines.
- Select "Submit New Manuscript" from the menu.
- Select "ICE Manuscript" as "Article Type".
- Enter manuscript "Title" and "Authors" when prompted; be sure to check the "Corresponding Author" box.
- Enter the files for manuscript body, figures, tables, etc. as requested.
- Submit when finished.

Elsevier will manage submission, peer review, and publication of the articles directly with each author, including reprint and copyright requests. Manuscripts accepted for publication will be published in the March/April issue of JECG.

ICE Manuscript Requirements

1. Electronic files must be in editable text format (e.g., Word, LaTeX); double interline spacing should be used.
2. Provide a separate title page, containing full institutional affiliations, complete mailing address for corresponding author, and email address/telephone number of corresponding author.
3. Manuscripts should be no more than 4 published journal pages in length. As a guide, this translates to about 10 pages of double spaced text material (exclusive of tables, figures, legends and references), or about 2000-2500 words.
4. Overlength manuscripts will be abridged to the proper length or, with the consent of the Publications Liaison, assessed publisher's page charges of \$500 per excess page prior to publication.*

5. References should be in standard journal format, with inclusive pagination for citations.
6. Illustrations must be provided as high quality JPEG or TIFF digital images (PDF files are not accepted). Illustrations should be uploaded separately, not embedded within the text.
7. Illustrations in the printed article are limited to 3. Color illustrations can be accommodated in the printed article when essential, but this will incur a separate publisher's charge per illustration to the author.*
8. Additional illustrations (black & white or color) may be submitted without charge for online viewing. These supplementary illustrations should be uploaded to the Elsevier website with the manuscript, but in a separate file from the illustrations included in the printed article.
9. Tables are limited to 2. Additional tables may be submitted without charge for online viewing. These supplementary tables should be uploaded to the Elsevier website in the same manner as supplementary illustrations (see #7).
10. Video illustrations related to the manuscript may be made available online by providing a QR code or referencing a file link (e.g. YouTube) within the manuscript.

** Authors wishing to submit more than the 4 allowed journal pages or to include color illustrations in the printed article will be billed directly by Elsevier. Questions concerning this procedure should be directed to the ISCE Publications Liaison.*

For more detailed instructions, please, see Guide for Authors at the JECG webpage <https://www.elsevier.com/journals/journal-of-electrocardiology/0022-0736/guide-for-authors> and Tutorial for Authors at http://help.elsevier.com/app/answers/detail/a_id/116/p/7923.
